Project Title: Simple responsive website

Task Description

Develop a simple, responsive website with both front-end and back-end functionality. Include a clean and intuitive design with a home page, about section, and contact form. Ensure mobile optimization and fast loading times. Implement a back-end server to handle form submissions and store data in a database. Ensure security best practices, clean, maintainable code, and cross-browser compatibility. Optimize for SEO and provide thorough documentation for easy maintenance and updates.
